Viatis Inc.

Viatis Inc.

Robert J. Coury Global Center, 1000 Mylan Blvd, Canonsburg, PA 15317

~37,000 global employees

\$15.39 billion total revenue

\$1.59 billion total GAAP gross profit

US: 724-514-1800 | CN: +86.21.32117198 | IN: +91.40.3086.6666

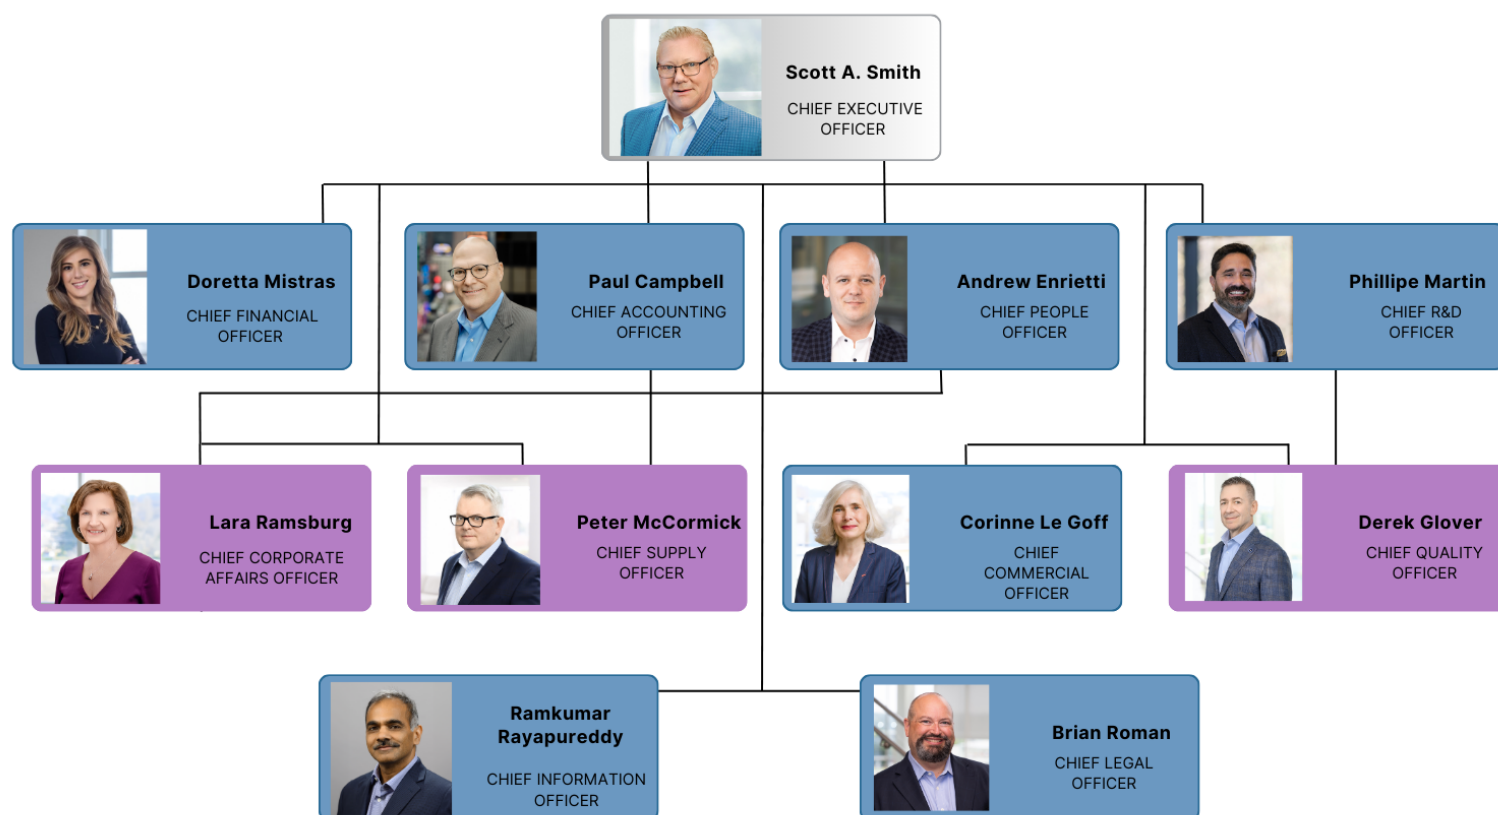

<https://www.viatis.com/>

\$VTRS

Viatis is one of the most valuable pharmaceutical company in the world, spanning industries from respiratory therapies, oncology, cancer treatments, and women's health care, it holds valuable private patient information such as address history, social security numbers, and other financial information like credit cards and bank accounts for payment information. Furthermore, competitors would buy intellectual property and trade secrets sold on the dark web to stay ahead and sabotage Viatis to their advantage.

The intelligence found on Viatis' employees and operations is fairly standard with some notable highlights. The great amount of details provided on the C-suite and office locations provide useful data to create spear-phishing and/or whaling campaigns against these high-value targets. The most useful information is the large listing of software that was available through online job postings. Viatis' most vulnerable assets will likely be their workstations that are connected to lab or manufacturing equipment. Often, these software licenses are very expensive in direct relation to the value that the machine provides. This is especially true for niche analysis machines which may not have a large demand in the market; companies are frequently lax in updating this software. This can lead to vulnerabilities never being patched, as well as weaknesses in unpatched operating systems as the outdated lab software is often not designed to run on more modern versions. The softwares in use have since been purchased by another company and renamed, indicating that Viatis is still utilizing outdated software. This could be extended to further suggest that their patch management is not mature. Provided they are not properly isolating these systems—which is again likely if they are not prioritizing spending on security—these workstations are ideal targets for a foothold into their system. These workstations may also grant access to both their laboratory networks and “standar” networks, depending on the method they use to transfer data from the laboratory to the offices.

Organizational Chart

Educational Associations

Harvard Business School - Paul Campbell, Andrew Enrietti, Derek Glover, Lara Ramsburg
 Wharton Business School / Pennsylvania State University - Doretta Mistras, Paul Campbell

Professional Associations

Mylan (Viatris Legacy Company) - Paul Campbell, Andrew Enrietti, Derek Glover, Lara Ramsburg, Ram Rayapureddy, Brian Roman
 Celgene, BioAtla - Scott A. Smith, Phillippe Martin
 Schering Plough - Ram Rayapureddy, Phillippe Martin

Detailed descriptions (Joining date, previous positions & associations, education details) [Link](#)

Assorted Staff

Staff below are all local to PA or nearby Pittsburgh unless otherwise noted.

- Chris Woodring - Director IT - Finance and Business Services at Viatris:
 - Benazir N. Senior Financial Systems Analyst at Viatris
- Tom Gintner - Director, Commercial Finance Branded Portfolio at Viatris
- Kara (Marciano) Curran - Director, Global Finance at Viatris (Birthday May 4th)
- Drew Spagnola- Senior Finance Director - Global FP&A at Viatris
- Christopher Busch - Director of Finance, Scientific Affairs at Viatris
- Michelle Maccagnan Director, Global Finance (Gibsonia, Pennsylvania)
- Jesse LouzyView Jesse Louzy's profile Lead Analyst, NA Commercial Finance at Viatris
- Morgan Zerbe, CPA Manager - SEC External Reporting and Technical Accounting at Viatris (Birthday February 26)
- Kyle Semetti, CPA Manager, Investor Relations at Viatris
- Santosh Philip Sr. Manager Gross to Net Accounting
- Lane Zhou, CPA Lead Tax Analyst @Viatris Greater Orlando
- Dávid Szigeti, ACCA Manager, Statutory Accounting & Controlling | ACCA (Budapest, Budapest, Hungary)
- Erica B. Senior Financial Analyst, Technical Accounting & External Reporting
- Eireann Pizzico, CPA, MBA Accounting Manager at Viatris Eye Care

Social Media Deep Dive 1: [Redacted]

Full Name: [Redacted]

Role: Chief Financial Officer (CFO)

Year of birth: [Redacted]

Age: [Redacted]

Address: [Redacted]

Phone: [Redacted]

Social Media: [Redacted]

- [Redacted] of honor [Redacted]
- Financial donor to [Redacted] 2019.

[Redacted] does not have much posted online that divulges personal information or affiliations, so we chose to locate addresses and places of work for immediate family members. All family members belong to the [Redacted]. They also all live within the [Redacted]

but likely travel between [Redacted]

Family Details – All are members of the [Redacted]

Full Name: [Redacted]

Relation: [Redacted]

Role: [Redacted]

Education: [Redacted]

Year of Birth: [Redacted]

Age: [Redacted]

Address: [Redacted]

Phone: [Redacted]

Full Name: [Redacted]

Relation: [Redacted]

Organization & Position: [Redacted]

Education: [Redacted]

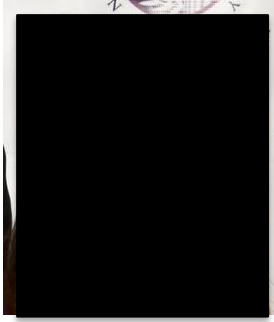

Year of Birth: [Redacted]

Age: [Redacted]

Phone: [Redacted]

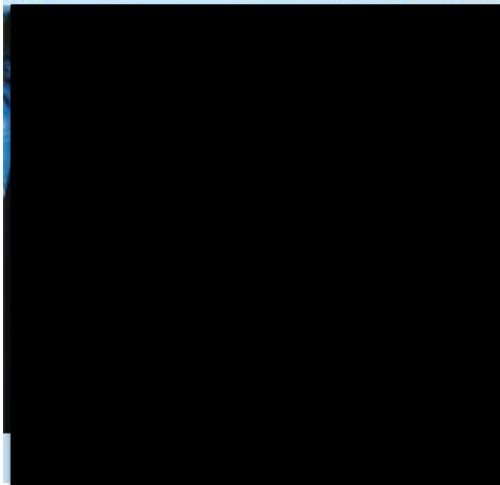

Email: [Redacted]

Address: [Redacted]

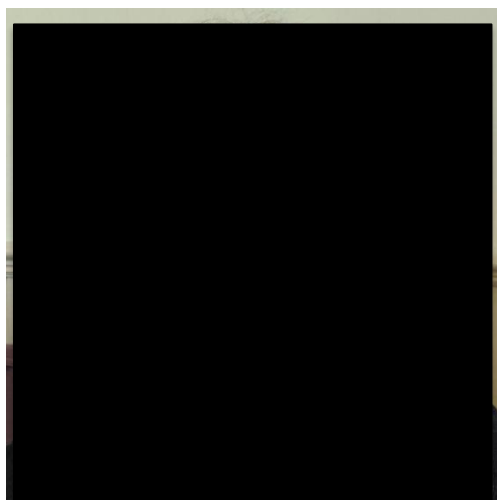

Full Name: [Redacted]
 Relationship : [Redacted]
 Year of Birth: [Redacted]
 Age: [Redacted]
 Phone: [Redacted]
 Email: [Redacted]
 Social Media: [Redacted]
 Address: [Redacted]

- Conference participant to [Redacted], 2024.
- Appeared in [Redacted] for Leadership 100 in 2012.
- Both [Redacted] have donated to the [Redacted].
- Both were also members of the [Redacted]. We can assume that they are fans of golfing.
- Both donated between \$0.01 and \$999.00 to [Redacted] for the [Redacted] academic year.
- Both appeared in [Redacted] where [Redacted] presented [Redacted] to them as new members.

-
- They still have ownership of [Redacted] address and own two properties in [Redacted].
- Donated to the [Redacted] in 2019 between \$0.01-\$999.

Social Media Deep Dive 2: [Redacted]

Name: [Redacted]

Title: Business Admin Executive

Address: [Redacted]

Official title: Business Admin Executive - Commercial

Work email: [Redacted]

Phone: [Redacted]

Birthday: [Redacted]

- Has a [Redacted]
- [Redacted]-daughter
- Has a [Redacted]-account

Personal email: [Redacted]

Linkedin: [Redacted]

Tiktok: [Redacted]

Facebook: [Redacted]

[Redacted] is very vocal about what projects they are working on or has worked on for Viatrix. We learned that projects and responsibilities include:

- Acting as the first point of contact / the crossover for 3 departments
 - Pharmacy Sales
 - Commercial Support: NPIs payments/credits
 - Marketing
- Oversees monthly payments/credits for OTC brands associated with the business unit
- Performs daily assistance duties to the Head of the Pharmacy Business Unit (Commercial
- Diary management
- Expenses
- Daily team functional duties
- Arranges quarterly team overnight off-site meetings for 25+ delegates in various UK locations
- Manages regular payment orders for payments through Smart Source (conferences, sponsorships, trainings, subscriptions, equipment)
- Tracking and authorizing team invoices
- Schedules regularly weekly meetings with AP to resolve payment issues

Technologies Used

- Microsoft Office Suite (Access, Excel, Word, Teams, Outlook)
- LabWare
- PK Statistical Program
- Sigma Plot
- Lotus Notes
- AutoCAD
- Empower
- Trackwise
- SAP (Financial, ECC, BW)
- Rapid Response
- Microsoft Azure Synapse
- Microsoft Azure Data Factory
- Power BI
- SQL Server Management Studio
- Salesforce
- Veeva
- Excel Power Query
- Amazon Web Service
- Documentum (EDMS)
- Power Apps
- Power Automate
- Tabular Editor
- FLEX

Website built with:

- OneTrust
- Optanon
- FullCalendar
- Disqus
- ASP.NET
- MediaElement.js
- Vimeo
- Workday CMS
- jQuery
- Modernizr
- Hammer JS
- Backbone.js
- Typeahead.js
- MSN/Bing Webmaster

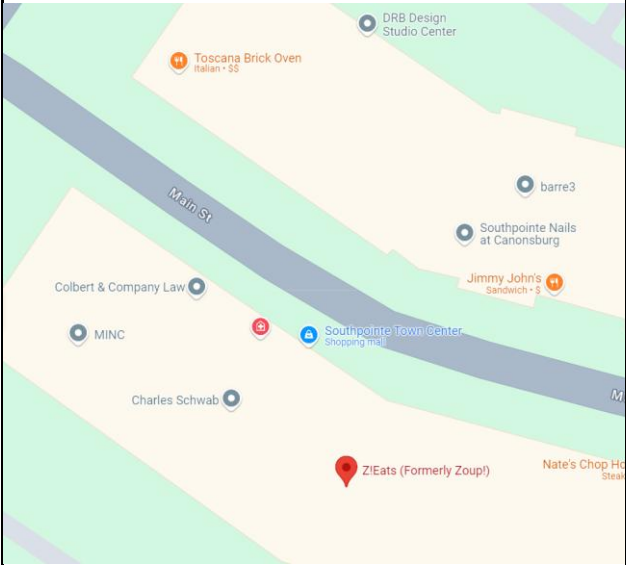

All of the above technologies and web platform tools are derived from job applications listed on Viatris' site along with <https://builtwith.com/?viatris.com%2fen>. Locations within the US typically refrain from posting about their specific applications, but every other country will largely post what software they use for a given role.

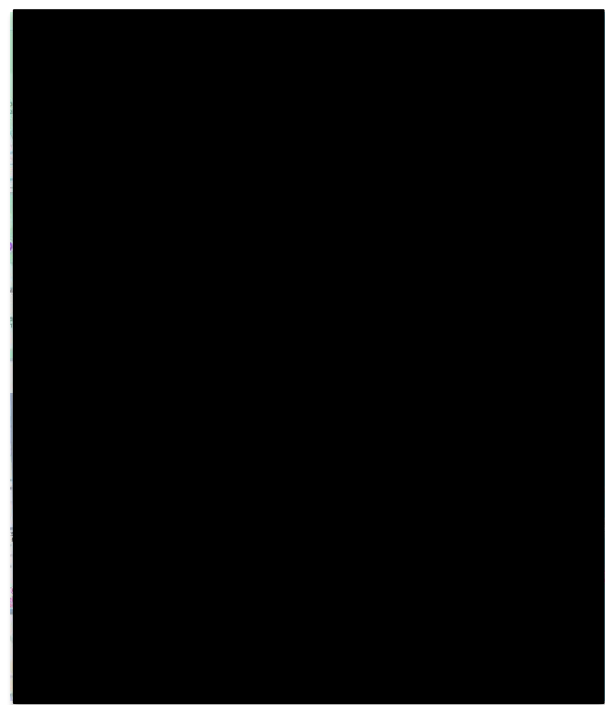

Notable Technology Vulnerabilities

<u>Technology</u>	<u>Business Use</u>	<u>Vulnerabilities</u>
Microsoft Office / 365	Documents, Communications	VBA Macros: older versions of Microsoft Office will enable macros by default, and newer versions will allow execution with user permission. This is a standard attack that can be used in conjunction with phishing emails delivering malicious files.
Labware	Laboratory Informatics	Two CVEs are publically available for old versions of LabWiki 1.0. Often, laboratory software is behind recent updates, making this a desirable target. These use a coding weakness in the search.php file to allow execution of web script on the host machine. https://www.cve.org/CVERecord?id=CVE-2006-2968 https://www.cve.org/CVERecord?id=CVE-2006-2850
Sigma Plot	Scientific Graphing and Data Analysis	Versions prior to version 13 are susceptible to the semi-recent Log4j vulnerability, as covered in CVE-2021-44228 . Reference: https://grafiti.com/log4j/
Lotus Notes	Collaboration Platform	Lotus Notes has been replaced with IBM Notes and HCL Notes. As such, there are a large number of publicly disclosed vulnerabilities . Any machine running this software is a prime target for exploitation.
Trackwise	Quality Management System	Trackwise is a cloud-service, and while no CVEs are released, the Exploit Database reports possible code execution through unsanitized user inputs. This could be used to steal session tokens from legitimate visiting users by impacting the sites themselves, or to scrape the cloud-server for intelligence. Reference: https://www.exploit-db.com/exploits/33687
Rapid Response	Supply Chain Management	This software has been replaced by Maestor, by Kinaxis. If older versions (Rapid Response) are found, they are a good target with several publicly disclosed vulnerabilities. On in particular requires physical access to the device, but can allow changes to the local machine BIOS settings without need of the BIOS administrator password: CVE-2020-5326

		This is an additionally valuable target as it may provide intelligence related to other suppliers that perform business with Viatris. This could reveal additional attack vectors to Viatris through these companies.
Power BI	Data Visualization	Among the publicly disclosed vulnerabilities, one allows an attacker to upload malicious templates to the server that can be used to farm credentials and session tokens from legitimate users. It also allows code execution as the legitimate user, meaning a privileged user accessing the template can lead to privileged code execution: CVE-2021-41372
Documentum (EDMS)	Enterprise Content Management	'Documentum has been acquired by several companies over the past decade, and as such has experienced a great deal of reported vulnerabilities. This is common when software undergoes multiple owners. A CVE as recent as last year (2023) allows for uploading and execution of code on the host machine. This covers a certain set of versions. CVE-2023-32264
Disqus	Communications	Disqus is a platform that provides services through web pages such as blogs, social networking, and user profiles. This may be used internally or on company pages or supplier portals. Most released CVEs are nearly a decade old, but if the trend of outdated software used by Viatris holds, it may be a viable option. More recently disclosed vulnerabilities appear to be Disqus interacting with other software, such as WordPress and Plugins. Depending on the way that the tool is being used, some of these vulnerabilities could be useful. References: https://cve.mitre.org/cgi-bin/cvekey.cgi?keyword=disqus
Vimeo	Video Hosting	Similarly to Disqus above, Vimeo itself is not vulnerable so much as its integrations can be. There are many CVEs associated with its integration with Wordpress. Improperly coded plugins provide opportunities to take advantage of the integration. If used against an internet portal for supplier or partners, this could be very damaging by infecting multiple companies. Alternatively, if hosted on a publicly available page, it would turn the exploited Vistria site into a malware watering-hole. CVE-2024-4316

Interaction Opportunities

	Viatrix HQ - 1000 Mylan Blvd, Canonsburg, PA 15317 • Nate's Chop House (Steakhouse) • Z!Eats (Burgers) • Toscana Brick Oven (Pizza) • Jimmy Johns (Sandwiches) • Southpointe Town Center (Shopping) Distance from Viatrix : 7 Min Walk, 2 Min Drive, 2 Min Bike ride
	Viatrix India office (R&D Centers) - Plot No 564, A/22, Road No. 92, MLA Colony, Jubilee Hills, Hyderabad, Telangana 500034, India • Navika Cafe • Medley -Restro Cafe • Srinu Food Park Possible supply chain to: • Asian Spine Hospital (1 mins) • Apollo Pharmacy • Apollo Fertility Hospital • Nova Multi Specialty Hospital (4 Mins) (On the basis of vicinity, they must have sent their representatives for sales)

	Areas near [Redacted] home: •  •  •  •  
	Areas near the  family: •  •  •  •  •  •  •  •  •  •  •  •  •  Country clubs are listed given the [Redacted] participation in country clubs in previous years, status is currently unknown, but the  would be the most likely bet.

The Chinese location was inexact and distorted on the map, so we left out this office location.

Additional Intel

- Wilson Sonsini Goodrich & Rosati is their current legal representation for litigation and a recent class action securities settlement in the Court of Common Pleas of Allegheny County, PA.
 - This class action is for: “All PERSONS who acquired shares of Viatris Inc. common stock in exchange for Mylan N.V. shares directly in the stock-for-stock exchange conducted pursuant to the offering materials issued in connection with the November 2020 merger of Mylan N.V. and Upjohn, Inc. to form Viatris.”
 - The settlement is a paltry \$16,000,000, implying very strong legal posture.
- High-value medications they own include Viagra, Xanax, Zoloft, Lipitor. Those seeking to flood the market with lower-cost alternatives would be privy to this information.
- Current members of the Pharmaceutical Supply Chain Initiative which includes 83 other pharmaceutical companies and 3 suppliers.
 - Defacing <https://pscinitiative.org> and embedding malware onto the website could be a vector for attack on numerous pharmaceutical companies and their suppliers and enable a significant amount of lateral movement.
- Viatris is a legacy division of Pfizer’s Established Medicines, so board members and leadership may have connections to that specific company.
- Viatris also frequently acquires other pharmaceutical companies, so targeting a smaller supplier they may be in talks with to move up the chain of command is an option.
 - Recent acquisitions:
 - Oyster Point Pharma (2023)
 - Famy Life Sciences (2023)
 - Upjohn (2020)
 - Renaissance Acquisition Holdings (Dermatology Division)
- They currently adhere to the NIST Cybersecurity Framework. Some cons of this framework include:
 - Log files and audits only have 30 days of storage
 - Weak to multiple 3rd parties for cloud computing
 - RBAC poses complications
 - NIST CSF is not legally mandated, so how extensively this framework is used is open-ended
- Ramkumar Rayapureddy, CISO, was charged in an insider trading scheme in 2022 which resulted in Dayakar Mallu, former president of global IT operations of Mylan (2014) pleading guilty. Sentencing for Mallu is set to take place on October 1st, 2024. However, the Department of Justice dismissed the case against Rayapureddy in January this year.
 - Proposed fiscal motivations may impact some individuals’ integrity.
